

## Diagnostic Imaging

# ***Interventional Radiology Patient Preparation and Information***

### **PATIENT PREPARATION:**

1. All patients will have pre-procedural blood work done prior to procedure – obtain a requisition from your physician.  
Blood work must be completed within thirty (30) days prior to their scheduled appointment date.
2. Please review ALL of your medications with your physician or health care provider.
3. Blood thinning medications may need to be held prior to the procedure. Consult with your physician or health care provider.
4. Bring all your medications with you on the day of your pre-op visit and/or procedure.
5. Patients should not have anything to eat or drink for at least 4 hours  
prior to procedure unless otherwise instructed. \*\*\* Do not take diabetic medications. Take all other regular medications  
with sips of water. \*\*\*
6. All patients must have a responsible adult drive them home following  
the procedure unless otherwise instructed.

**Incomplete preparation will usually require rescheduling of your procedure / treatment.**
